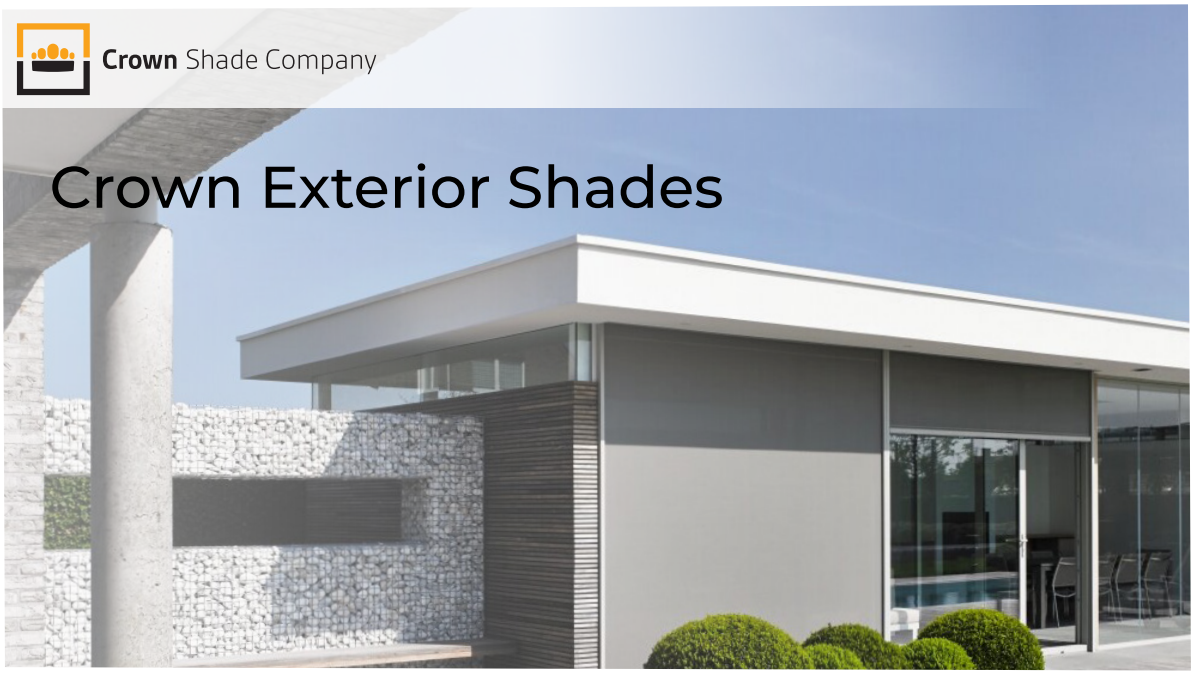
Crown Shade Company

Crown Exterior Shades



Why Choose Exterior Shades?

- **Sun Protection**
  Keep your outdoor space cool and protect outdoor furniture from sunlight
- **Bug Screens**
  When fully lowered, enclosed zip screens keep unwanted pests out. Choose Phifer Tuffscreen fabric for enhanced insect protection
- **Wind Resistance**
  Designed to withstand strong winds with vertical zip tracks that hold the fabric in place, keeping the material wrinkle-free and taut even in windy conditions up to 35 mph in free-standing locations and up to 75 mph when installed on the outside of a window.

INSTALLATION OPTIONS

Surface Mounted

- Roller shade encapsulated in a front-loading weatherproof cassette
- 4” (w) x 4” (h) or 6” (w) x 6” (h) cassette options available for a variety of shade sizes
- Available in many colors including a custom color option for a perfect match

Recessed Mounted

- Roller shade encapsulated in a front-loading weatherproof cassette
- 4” (w) x 4” (h) or 6” (w) x 6” (h) cassette options available for a variety of shade sizes
- Open roller shade option that ships with end support brackets only, ideal for site-built soffits and can also be recessed into tight spaces for a minimalist installation.

Ultra-Wide

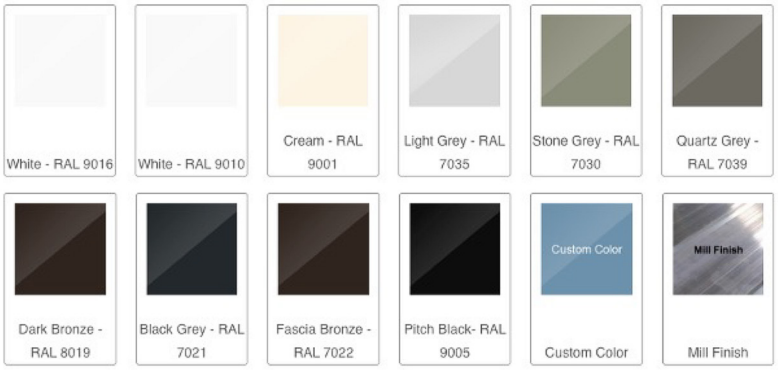
- Shading designed to go up to 60 feet in length and ideal for large openings requiring seamless coverage.

Skylights and Pergolas

- Perfect for exterior overhead applications requiring tensioned fabric

COLOR SELECTION

- Material colors can be selected for the following parts of the system: head box and hem bar.
- Custom colors available for a custom charge



PRODUCT FEATURES & OPTIONS

- **Zip Track Fabric Retention**
  Co-molded inner guidance system ensures superior wind resistance and smooth operation.
- **Obstacle Detection**
  Line voltage powered exterior shades automatically reverse when the bottom bar meets an obstacle.
- **Optional Cable Guide**
  Stainless steel cable guide system for applications where zip tracks aren't possible.
- **Solar Powered Operation**
  Available when wiring is not available. Can power up to a 20' wide shade system
